

ABBAS QADIR

Birmingham, UK | 07537 803294 | contact.abbasq@gmail.com | abbasq.com

PROFILE

BSc (Hons) Computer Science graduate from Aston University with a working understanding of the full software stack, from web development in HTML, CSS, JavaScript, React and Next.js, to backend work in Java (Spring Boot) and Python, and some exposure to machine learning through a final-year project comparing neural network and tree-based models. Also comfortable working with AI coding tools such as Claude Code and Codex as part of the development workflow. Combines this with two years of freelance experience delivering client-facing websites end to end, from requirements gathering through deployment. Looking for a junior software or IT role where I can keep building on both.

EDUCATION

BSc (Hons) Computer Science | Aston University, Birmingham

- Final-year project: built and compared MLP neural network, XGBoost and Random Forest classifiers to predict telecom customer churn on the Cell2Cell dataset, using SHAP for model interpretability.

Level 3 Business and Finance | Dudley College of Technology

EXPERIENCE

Freelance Web Designer & Developer | Self-Employed 2024 – Present

- Designed and built responsive websites for small businesses, managing each project from planning through deployment.
- Worked directly with clients to scope requirements and translate them into tailored technical solutions.
- Optimised sites for performance, accessibility and basic SEO.

Shift Supervisor | Pizza Hut Delivery

- Led a team during shifts, assigning tasks and troubleshooting issues to keep operations running smoothly.
- Managed customer interactions in-store and by phone, resolving issues and maintaining strong service KPIs.

Virtual Developer Program | Bentley X Enactus — iTwin4Good

- Contributed to the ideation, design and implementation of a virtual development project on the iTwin platform, earning a completion badge.

TECHNICAL SKILLS

- Languages & frameworks: JavaScript, HTML/CSS, Java (OOP, Spring Boot), Python, SQL, React, Next.js
- Data & ML: Python data analysis, neural networks (MLP), XGBoost, Random Forest, SHAP for interpretability
- AI-assisted development: Claude Code, Codex
- Tools: Git, version control workflows, website performance and basic SEO optimisation

PROJECTS

Customer Churn Prediction (Final Year Project)

- Compared MLP neural networks against XGBoost and Random Forest for predicting telecom customer churn; used SHAP to interpret model behaviour and identify key churn drivers.

Personal Portfolio | abbasq.com

- Built and maintain a personal site showcasing development projects and freelance work.

CERTIFICATIONS

- Bentley X Enactus iTwin4Good — Virtual Developer Program badge
- Full Stack Engineer course, Codecademy — in progress
